

## Arctic Tern Acrylic Window Care Guide

Following these simple steps will ensure long service life  
from your acrylic windows.

1. Always rinse abrasive dust from the window before cleaning.
2. Never use glass cleaner to clean acrylic unless it specifically says it is meant for acrylic. Ammonia based cleaners are especially damaging. A better solution is a few drops of dish washing liquid in water. Dry with a soft towel or chamois.
3. Automated car washes should be avoided due to the possible abrasives in the wash wheels. These are not so good for your paint either!
4. We recommend Novus brand plastic cleaners and polishes:  
**Novus 1** is for day to day cleaning. It leaves a bright, static free surface that resists fogging and finger prints.  
**Novus 2** is for polishing out fine scratches. It should always be followed by Novus 1  
**Novus 3** is for removing deeper scratches. It should always be followed Novus 1 and 2
